SUBJECT INDEX

Abstracts of the scientific sessions and member-submitted papers for the ASMT 49th Annual Meeting, Miami Beach, FL, June 1981
Member-submitted papers, 356, 653
Scientific sessions, 343

ACA II, Calibration of
Computer-based calibration of the DuPont ACA II, 737
See also "Computer-based calibration"

Academic affiliation
Academic affiliation of medical laboratory science and pharmacy programs: advantages for growth and recognition, 194

Academic Rank
Academic rank and salary status of medical laboratory sciences faculty, 991

Admissions
Predicting academic performance in medical technology: A university-based program in retrospect, 314
Uniform admissions system for a medical laboratory sciences program, 489

Affective domain
Trigger films for teaching in the affective domain, 255

Anaerobes
Rapid methods in microbiology: IV. Presumptive and rapid methods in anaerobic bacteriology, 705

Annual Meeting, ASMT
Exhibitors' Product List, 396
See also "Society Issues" and "Abstracts of the Scientific Sessions . . ."

Annual Report, ASMT
1980–81 Annual report American Society for Medical Technology, 843

Antibiotics
Pharmacokinetic concepts and applications affecting the clinical laboratory: II. Applications for antibiotic and anticoagulant drugs, 172

Antibodies
Neutrophil antibodies: detection and clinical application, 805
Platelet antibodies: Their detection and significance, 797

Anticoagulants
Pharmacokinetic concepts and applications affecting the clinical laboratory: II. Applications for antibiotic and anticoagulant drugs, 172
Case study: Complications associated with anticoagulant therapy, 179

Antiglobulin test
An ELISA method for detecting unexpected antibodies, 913

Anti-Kell
Two additional examples of non-transfusion stimulated anti-Kell, 983

Apoproteins
Cholesterol and apoprotein quantitation in lipoproteins, 545

ASMT E & R Fund
ASMT Education & Research Fund, Inc. honors, research grants, scholarships, 1981–82, 851

Autoradiography
Autoradiography of diffusible substances—a practical approach, 38

Babesiosis
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21

Bacterial osteomyelitis
Case study: Diagnosis and therapy of bacterial osteomyelitis—role of the medical technologist and clinical pharmacist, 179

Bacteriocin typing
Comparison of epidemiological methods for differentiation of *Proteus mirabilis*, 835

Bacteriophage typing
Comparison of epidemiological methods for differentiation of *Proteus mirabilis*, 835

Biochemistry
Biochemistry Mini-Course—Unit One: Basic Principles, 133
Biochemistry Mini-Course—Unit Two: Chemical Constituent Function, 201
Biochemistry Mini-Course—Unit Three: Methodology I, 275
Biochemistry Mini-Course #3—Unit Four: Methodology II, 335
Biochemistry Mini-Course—Unit Five: Special Procedures and Specimens, 501
Biochemistry Mini-Course—Unit Six: Clinical Correlation—Case Studies, 573

Biotyping
Comparison of epidemiological methods for differentiation of *Proteus mirabilis*, 835

Blood donors
Blood donors and non-donors: A review of the research, 248

Books reviewed
Annual Review of Clinical Biochemistry, Volume 1, 868
Atlas of Blood Cells: Function and Pathology, 1003
Basic Biochemistry, 282
Basic Medical Microbiology, 945
Biochemical Tests for Identification of Medical Bacteria, 666
Biochemistry: A Case-Oriented Approach, 665
Blood Coagulation and Haemostasis: A Practical Guide, 665
Chemistry for the Allied Health Sciences, 13
Clinical Hematology for Blood Bankers, 281
Clinically Significant and Insignificant Antibodies, 368
Clinical Pathology: Continuing Education Review, 946
Computers in Medicine: An Introduction, 583
Differential Leukocyte Counting, 141
Electrophoresis: A Survey of Techniques and Applications. Part A: Techniques, 771
The Elements of Life: An Approach to Chemistry for the Health Sciences, 771
Fundamental Skills in Hematology, 867
Gynaecological Cytology: A Textbook and Atlas, 772
Human Red Cell Metabolism, 584
Introduction to Microbiology, 772
Laboratory Mathematics: Medical and Biological Applications, 511
Laboratory Medical Mycology, 280
Laboratory Tests in Medical Practice, 370
Lecture Notes on Medical Microbiology, 2nd Edition, 583
Manual of Clinical Microbiology, 511
Medical Microbiological Techniques, 585
The Medical Mycology Handbook, 667
Medical Parasitology, 945
Methods in Immunodiagnosis, 945
Microbial Diseases: Notes, Reports, Summaries, Trends, 368
Microbiology and Pathology, 12th Edition, 585
New Directions in Public Health Care: A Prescription for the 1980's, 1004
Nuclear Medicine: A Clinical Introduction, 367
Ova and Parasites, 667
Paediatric Chemical Pathology: Clinical Tests and Reference Ranges, 584
Pocket Atlas of Human Histology, 946
Practical Concepts in Human Disease, 772
A Practical Guide to Microbial and Parasitic Diseases, 200
Practical Microscopic Hematology, 281
Platelet Transfusion, 868
Schneierson's Atlas of Diagnostic Microbiology, 7th Edition, 200
Sobotta/Hammersen Histology: A Color Atlas of Cytology, Histology and Microscopic Anatomy, 512
Synopsis of Pathology for the Allied Health Professions, 280
Technical Hematology, 3rd Edition, 665
Theory and Practice of Histotechnology, 2nd Edition, 367
Trouble-Shooting the Crossmatch, A Technical Workshop, 369
Vaccines Against Parasites, 280
Virology in Health Care, 867
Urine Sediment Examination, 666

Brilliant cresyl blue stain
An improved method for detection of red cell hemoglobin H inclusions, 94
Bromcresol green dextrose broth
Bromcresol green dextrose broth for the presumptive identification of group B streptococci, 35
Calcium metabolism
Erythrocyte shape transformation associated with calcium accumulation, 561
Cell stability
Cell and platelet stability in disodium and tripotassium EDTA, 89
Chemistry
Calibration of a strip test for urinary urobilinogen using a mercuric chloride assay with crystalline reference standards, 729
Cholesterol and apoprotein quantitation in lipoproteins, 545
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Laboratory variables in determining lecithin/sphingomyelin ratios, 901
Lipid measurements for coronary risk assessment: A review, 539
Urinalysis problem, 245
Cholesterol
Cholesterol and apoprotein quantitation in lipoproteins, 545
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Lipid measurements for coronary risk assessment: A review, 539
CIE L*a*b* values
Calibration of a strip test for urinary urobilinogen using a mercuric chloride assay with crystalline reference standards, 729
Classification of leukemias
Classification of leukemias (Letter), 679
Coagulase
Free coagulase and thermostable nuclease reactions of staphylococci: A comparison, 237
Cold agglutinins
Hematology problem, 819
Communication
From peer to supervisor: Factors affecting a smooth transition, 107
Computer-based calibration
Computer-based calibration (Letter), 955
Computer-based calibration of the DuPont ACA II, 737
Computers
Adaptation to the computer assisted instruction (CAI) environment: One example, 886
Computer Expo 1981: An AJMT special report, 885
Computer Expo 1981: Introduction, 885
Computer graphics & catastrophe theory: A new analytical tool, 888
Laboratory data processing: Problems and solutions, 886
Continuing education
Design and administration of a continuing education policy, 715
Control chart
Three-pool analysis for quality control: A method for daily differentiation of analytic error from random variability, 321
Coronary heart disease
Lipid measurements for coronary risk assessment: A review, 539
Cost containment
A priori considerations when using laboratory determinations in cost-effectiveness and clinical decision analyses, 619
ASMT White Paper on Health Care Cost Containment, 603
Containing costs through competition: The new wave, 607
Federal laboratory regulation: Operational improvement and cost impact, 613
A laboratory productivity monitoring system, 631
Motivation as a budgetary tool, 639
Cryptococcus neoformans
A case of *Crytococcus neoformans* in bone marrow, 821
Cytochemistry
Use of cytochemistry and FAB classification in leukemia and other pathological states, 437
Decision analysis
A priori considerations when using laboratory determinations in cost-effectiveness and clinical decision analyses, 619
De-regulation
Containing costs through competition: The new wave, 607
Dermatophytes
Laboratory alert: Clues to the identification of dermatophytes as the etiologic agents of subcutaneous abscesses, 567
Differential leukocyte count
Evaluation of the monocyte channel of the Hemalog-D: Correlation with visual microscopy, 923
Drug interference
Case study: drug interference in clinical chemistry, 189
Drug interference with laboratory value interpretation: A review, 183
Ecchinocytes
Erythrocyte shape transformation associated with calcium accumulation, 561
Editorial
The clinical laboratory in the age of competition, 594
Competence assurance, 528
Continuing education—Continuing competence, 678
Educational programs: Some thoughts for 1981, 11
Evaluation/Revitalization, 294
How many times before ENOUGH?, 878
The laboratory—pharmacy connection, 153
NCCLS: Why bother?, 84
Platelet, neutrophil and HTLA antibodies, 778
Quality assurance for the sake of public accountability, 952
Welcome!, 384
EDTA
Cell and platelet stability in disodium and tripotassium EDTA, 89
Education
Academic rank and salary status of medical laboratory sciences faculty, 991
Combining academic resources in medical technology education: A model working affiliation, 43
A course in electronics and instrumentation, 919
Dependability and interrater reliability of two types of rating scales, 98
Design and administration of a continuing education policy, 715
Educating clinical laboratory scientists in the 1980s: Some suggestions, 259
Letter to the editor, 296
Predicting academic performance in medical technology: A university-based program in retrospect, 314
Teaching the health care team (Letter), 529
Time for learning (Letter), 386
Trigger films for teaching in the affective domain, 255
Uniform admissions system for a medical laboratory sciences program, 489
Electronics
A course in electronics and instrumentation, 919
ELISA
An ELISA method for detecting unexpected antibodies, 913
ELISA: A tool for the clinical microbiologist, 905
Endocarditis
Endocarditis caused by *Neisseria mucosa* in a patient with a prosthetic heart valve, 909
Endolemax nana
Microbiology problem, 328
Erythrocyte shape
Erythrocyte shape transformation associated with calcium accumulation, 561
Ethanol
Ethanol—The social drug, 197
Exhibitors' product list
Exhibitors' Product List, 396
Factor VII deficiency
Hematology problem, 645
Federal regulation
Federal laboratory regulation: Operational improvement and cost impact, 613
Filariasis
Filariasis: A case history, 569
French-American-British classification
Use of cytochemistry and FAB classification in leukemia and other pathological states, 437
Gram-negative organisms
Rapid methods in microbiology: III. Rapid methods for the identification of gram-negative organisms, 693
Gram-positive organisms
Rapid methods in microbiology: II. Rapid identification of gram-positive organisms, 687
HDL cholesterol
Cholesterol and apoprotein quantitation in lipoproteins, 545
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Lipid measurements for coronary risk assessment: A review, 539
Hemalog-D
Evaluation of the monocyte channel of the Hemalog-D: Correlation with visual microscopy, 923
Hematology
Cell and platelet stability in disodium and tripotassium EDTA, 89
Comparative veterinary hematology: A bird's eye view, 985
Control mechanisms in platelet activation, 813
Erythrocyte shape transformation associated with calcium accumulation, 561
Evaluation of the monocyte channel of the Hemalog-D: Correlation with visual microscopy, 923
Hematology problem, 48, 331, 645, 819, 933, 977
An improved method for detection of red cell hemoglobin H inclusions, 94
Red cell distribution width in sickle cell anemia, 231
A review of platelet function and testing, 723
Use of cytochemistry and FAB classification in leukemia and other pathological states, 437
HTLA antibodies
Serological investigation and clinical significance of high-titer, low-avidity (HTLA) antibodies, 789
Hemoglobin H inclusions
An improved method for detection of red cell hemoglobin H inclusions, 94
Hemolytic anemia
Case study: Drug-induced hemolytic anemia, 192
Histology
Autoradiography of diffusible substances—A practical approach, 38
HLA-matched platelets
Transfusion strategy: Use of HLA-matched platelet transfusions for alloimmunized patients, 114
Horseradish peroxidase
An ELISA method for detecting unexpected antibodies, 913

Hybridomas
Hybridomas: Their role in the clinical and research laboratory, 891
Hyperlipidemia
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Immunohematology
An ELISA method for detecting unexpected antibodies, 913
Immunohematology problem, 485
Neutrophil antibodies: Detection and clinical application, 805
Platelet antibodies: Their detection and significance, 797
Serological investigation and clinical significance of high-titer, low-avidity (HTLA) antibodies, 789
Transfusion strategy: Use of HLA-matched platelet transfusions for alloimmunized patients, 114
Two additional examples of non-transfusion stimulated anti-Kell, 983
Immunology
Hybridomas: their role in the clinical and research laboratory, 891
Instrumentation
A course in electronics and instrumentation, 919
Evaluation of clinical laboratory instruments. Part I: Defining laboratory needs, 225
Evaluation of clinical laboratory instruments. Part II: Use and abuse of statistical tools, 303
Evaluation of clinical laboratory instruments. Part III: Spectral bandwidth and wavelength accuracy, 477
Laboratory careers
Graduate degrees for the health professions, 389
Unusual lab job provides best of both worlds, 19
Laboratory management
ASMT White Paper on Health Care Cost Containment, 603
Ealuation of clinical laboratory instruments. Part I: Defining laboratory needs, 225
Evaluation of clinical laboratory instruments. Part II: Use and abuse of statistical tools, 303
From peer to supervisor: Factors affecting a smooth transition, 107
A laboratory productivity monitoring system, 631
Motivation as a budgetary tool, 639
Statements of competence for practitioners in the clinical laboratory sciences, 647
LDL cholesterol
Cholesterol and apoprotein quantitation in lipoproteins, 545
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Lipid measurements for coronary risk assessment: A review, 539
Lecithin/sphingomyelin ratio
Laboratory variables in determining lecithin/sphingomyelin ratios, 901
Legionella pneumophila
Microbiology problem, 825
Leishmaniasis
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21
Letters to the editor
Classification of leukemias, 679
Computer-based calibration, 955
Teaching the health care team, 529
Time for learning, 386
Letter to the editor, 296
Leukemia
Use of cytochemistry and FAB classification in leukemia and other pathological states, 437
Leukemia, chronic granulocytic
Hematology problem, 819
Leukemia, chronic lymphocytic
Hematology problem, 331
Leukocytes
Neutrophil Antibodies: Detection and clinical application, 805
Lipemia
Hematology problem, 819
Lipids
Cholesterol and apoprotein quantitation in lipoproteins, 545
The clinical laboratory and hyperlipidemia: A clinician's view, 551
Lipid measurements for coronary risk assessment: A review, 539
Lipoprotein
Cholesterol and apoprotein quantitation in lipoproteins, 545
Lipid measurements for coronary risk assessment: A review, 539
Malaria
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21
Hematology problem, 48
Mercuric chloride assay
Calibration of a strip test for urinary urobilinogen using a mercuric chloride assay with crystalline reference standards, 729
Microbiology
A case of *Cryptococcus neoformans* in bone marrow, 821
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21
ELISA: A tool for the clinical microbiologist, 905
Endocarditis caused by *Neisseria mucosa* in a patient with a prosthetic heart valve, 909
Filariasis: A case history, 569
Free coagulase and thermostable nuclease reactions of staphylococci: A comparison, 237
Laboratory alert: Clues to the identification of dermatophytes as the etiologic agents of subcutaneous abscesses, 567
Microbiology Mini-Course—Unit One: Diarrhea, 661
Microbiology Mini-Course—Unit Two: Respiratory Tract Infection, 765
Microbiology Mini-Course—Unit Three: Urinary Tract Infection, 861
Microbiology Mini-Course—Unit Four: Venereal Disease, 939
Microbiology Problem, 328, 825, xxxx
Topics in microbiology, 1979: #5, 28
Topics in microbiology, 1979: #6, 122
Microbiology, rapid methods
Rapid methods in microbiology: I. Introduction, 685
Rapid methods in microbiology: II. Rapid identification of gram-positive organisms, 687
Rapid methods in microbiology: III. Rapid methods for the identification of gram-negative organisms, 693
Rapid methods in microbiology: IV. Presumptive and rapid methods in anaerobic bacteriology, 705
Mini-course
Biochemistry Mini-Course, 133, 201, 275, 335, 501, 573
Microbiology Mini-Course, 661, 765, 861, 939, 997
Monoclonal antibodies
Hybridomas: Their role in the clinical and research laboratory, 891
Monocytes
Evaluation of the monocyte channel of the Hemalog-D: Correlation with visual microscopy, 923
Myeloproliferative disorder
Hematology problem, 977
National Committee for Clinical Laboratory Standards
NCCLS voluntary standards: A professional opportunity, challenge and responsibility, 130
Neisseria Mucosa
Endocarditis caused by *Neisseria mucosa* in a patient with a prosthetic heart valve, 909
Neutrophils
Neutrophil antibodies: detection and clinical application, 805
New products, preview of
American Society for Medical Technology preview of new products, 740
Nosocomial infections
Comparison of epidemiological methods for differentiation of *Proteus mirabilis*, 835
Parasitology
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21
Clinical diagnostic parasitology: #13 Self-assessment programs, 53
Personnel
The issue of quality of personnel, 971
Quality personnel, 973
Pharmacokinetics
Pharmacokinetic concepts and applications affecting the clinical laboratory: I. General concepts and applications, 157
Pharmacokinetic concepts and applications affecting the clinical laboratory: II. Applications for antibiotic and anticoagulant drugs, 172
Plasmodium falciparum
Hematology problem, 48
Platelets
Accuracy of low electronic platelet counts using platelet distribution curves, 15
Cell and platelet stability in disodium and tripotassium EDTA, 89
Control mechanisms in platelet activation, 813
Platelet antibodies: Their detection and significance, 797
A review of platelet function and testing, 723
Transfusion Strategy: Use of HLA-Matched Platelet Transfusions for Alloimmunized Patients, 114
Porphyria, acute intermittent
Urinalysis problem, 245
Predictive value model
The predictive value theory redefines quality assurance, 965
Pre-leukemia
Hematology problem, 977
Proteus mirabilis
Comparison of epidemiological methods for differentiation of *Proteus mirabilis*, 835
Quality assurance
The issue of quality of personnel, 971
The predictive value theory redefines quality assurance, 965
Proposals and current practices in quality control, 957
Quality personnel, 973
Quality control
Proposals and current practices in quality control, 957
Three-pool analysis for quality control: A method for daily differentiation of analytic error from random variability, 321
Radiation accident
The medical technologist and the radiation-accident victim, 829
Rating scales
Dependability and interrater reliability of two types of rating scales, 98
Red cell distribution width
Red cell distribution width in sickle cell anemia, 231
Reference standards
Proposals and current practices in quality control, 957
Researcn
Accuracy of low electronic platelet counts using platelet distribution curves, 15
Comparison of epidemiological methods for

differentiation of *Proteus mirabilis*, 835
Safety
The medical technologist and the radiation-accident victim, 829
Salary status
Academic rank and salary status of medical laboratory sciences faculty, 991
Schistosomiasis
Microbiology problem, 981
Self-assessment
Clinical diagnostic parasitology, 53
Sickle cell anemia
Red cell distribution width in sickle cell anemia, 231
Sideroblastic anemia
Hematology problem, 933
Society issues
ASMT 49th Annual Meeting: Preliminary program, 268
ASMT's winter workshop program—Hawaii, 759
Miami Beach: Our place in the sun, 262
NCCLS voluntary standards: A professional opportunity, challenge and responsibility, 130
Spectral bandwidth
Evaluation of clinical laboratory instruments. Part III: Spectral bandwidth and wavelength accuracy, 477
Standard normal deviate
Three-Pool analysis for quality control: A method for daily differentiation of analytic error from random variability, 321
Standards, voluntary
NCCLS voluntary standards: A professional opportunity, challenge and responsibility, 130
Staphylococcus aureus
Free coagulase and thermostable nuclease reactions of staphylococci: A comparison, 237
Statements of Competence
Statements of competence for practitioners in the clinical laboratory sciences, 647
Statistics
Evaluation of clinical laboratory instruments. Part II: Use and abuse of statistical tools, 303
Evaluation of clinical laboratory instruments. Part III: Spectral bandwidth and wavelength accuracy, 477
Stercobilin
Calibration of a strip test for urinary urobilinogen using a mercuric chloride assay with crystalline reference standards, 729
Streptococci
Bromcresol green dextrose broth for the presumptive identification of group B streptococci, 35
Technical note
Bromcresol green dextrose broth for the presumptive identification of group B steptococci, 35
Computer-based calibration of the DuPont ACA II, 737
Gravimetric determination of urine volumes, 111
Thalassemia
Hematology problem, 48
Therapeutic drug monitoring
Pharmacokinetic concepts and applications affecting the clinical laboratory: I. General concepts and applications, 157
Therapeutic drug analysis and the clinical laboratory, 165
Pharmacokinetic concepts and applications affecting the clinical laboratory: II. Applications for antibiotic and anticoagulant drugs, 172
Case study: Diagnosis and therapy of bacterial osteomyelitis—Role of the medical technologist and clinical pharmacist, 176
Case study: Complications associated with anticoagulant therapy, 179
Drug interference with laboratory value interpretation: A review, 183
Case study: Drug interference in clinical chemistry, 189
Case study: Drug-induced hemolytic anemia, 192
Thermostable nuclease
Free coagulase and thermostable nuclease reactions of staphylococci: A comparison, 237
Thrombocytopenia
Platelet antibodies: Their detection and significance, 797
Transfusions, platelet
Transfusion strategy: Use of HLA-matched platelet transfusions for alloimmunized patients, 114
Trichuris trichiura
Microbiology problem, 328
Trigger films
Trigger films for teaching in the affective domain, 255
Trypanosomiasis
Diagnostic clinical parasitology: IV. Identification of the blood parasites, 21
Urinalysis problem
Urinalysis problem, 245
Urine weight
Gravimetric determination of urine volumes, 111
Urobilinogen
Calibration of a strip test for urinary urobilinogen using a mercuric chloride assay with crystalline reference standards, 729
Veterinary hematology
Comparative veterinary hematology: A bird's eye view, 985
Washington perspective
The Clinical Laboratory Improvement Act: A retrospective view, 205
Wavelength accuracy
Evaluation of clinical laboratory instruments. Part III: Spectral bandwidth and wavelength accuracy, 477

Notice to Contributors

The *American Journal of Medical Technology* is an official, copyrighted, monthly publication of the American Society for Medical Technology, devoted to the dissemination of knowledge in all areas of medical technology. Manuscripts and all correspondence concerning publication should be directed to the *American Journal of Medical Technology*, 211 East 43rd St., New York, NY 10017. Material must be original and must not have been previously published or accepted for publication by other media. Exceptions may be made for articles published in constituent society publications, provided this information is supplied to the editor-in-chief.

PREPARATION OF MATERIAL: ASMT's *Information for Authors* (sent free on request) should be the guide to correct preparation and style of the manuscript. Standard reference works are the *Style Manual for Biological Journals, Bergey's Manual for Determinative Bacteriology, Dorland's Illustrated Medical Dictionary*, and *Webster's New International Dictionary*.

Manuscripts must be submitted in triplicate. All copy including footnotes, figure legends, tables, and references should be typed double-spaced on one side of 8½ by 11 inch bond paper. Margins should be at least one inch on all sides. In general, the format should be abstract, introduction, materials and methods, results, discussion, acknowledgments, references. Separate pages should be prepared for title, author's name and address, acknowledgments, references, tables, figure legends, and footnotes. The abstract should not exceed 150 words. References should be restricted to pertinent papers, listed alphabetically, numbered in sequence, and cited by superscript numerals in the body of the text. Reference for journal abbreviations is the *Index Medicus*.

Tables should be numbered with Roman numerals and titled; figures should be numbered with Arabic numerals and accompanied by legends. No part of a chart or graph should be typewritten or lettered freehand. For figures, glossy print photographs no larger than 8½ by 11 inch and suitable for reduction are required. Figure number and author's name should be written separately and taped to back of photograph. Top and bottom should be indicated, and the stain and magnification should be given for all photomicrographs.

FEATURE ARTICLES, DEPARTMENTS, AND OTHER NONTECHNICAL MATERIAL: It is not necessary to follow the abstract, introduction, methods, and similar stringent guidelines essential to the publication of scientific articles. Feature material should, however, be submitted in triplicate, double-spaced, and referenced properly (as above). Suitable topics include: management, personnel problems, federal regulations' effect on laboratory operations, unusual careers, cost control methods, continuing education, new instrumentation, and unusual people or personal experiences. If references are needed, they should be included *and* cited with superscript numerals within the text. As with the technical material, photographs and figures should be glossy reproductions, and all articles should include the title, and the author's name and address.
